

1515 BOCA

WiredScore fact sheet

Connectivity isn't a nice to have, it's a requirement

That's why 1515 BOCA has worked with WiredScore to measure, improve and certify its digital connectivity.

WiredScore is the world's only internationally recognized digital connectivity rating scheme. 1515 BOCA has been awarded a WiredScore Gold rating for its outstanding digital connectivity!

WiredScore
GOLD

What does this mean?

Connectivity

Five or more high-speed internet providers are available (fiber or fixed wireless) giving tenants options at a competitive rate.

Fiber connectivity is ready to deliver high-speed internet to tenants.

There is at least one fully distributed fiber option throughout the building to provide tenants with faster installation time and minimum disruption.

There is free Wi-Fi in a common area to provide seamless internet connectivity and to enable guests to connect upon arrival.

Infrastructure

The space allocated for service provider equipment is secured with access control and dedicated to improve data security and reduce risks of accidental damage.

There is capacity available throughout the riser(s) to enable faster installations of new connectivity services.

There is space available in the telecommunication room(s) to accommodate new internet service providers, enabling faster installation times.

Access Readiness

There is a signed access agreement available with at least one internet service provider to streamline installation and offer full transparency to tenants.

There is a standardized access agreement on file to expedite future installations of internet service providers.

There is a tenant connectivity guide available to assist tenants in getting connected faster.

Connectivity options

Fiber/Fixed Wireless	Distribution
AT&T	Full Distribution
Crown Castle Fiber	Partial Distribution
Crown Castle Fiber	Partial Distribution
FiberLight	Partial Distribution
Fision	Partial Distribution
LUMEN	Full Distribution
Coax/Copper	Distribution
AT&T	Full Distribution

Additional details

Address

1515 S. Federal Highway, Boca Raton
FL,

Building Size

180,000 Sqft

Expiration

September 9, 2025

Classification

WiredScore - V3 - Office - Single Building - Occupied

Certification ID

44378

Technical jargon

Fiber

The most technologically advanced form of cabling used in buildings. Direct fiber provides dedicated high speed connections with equal download and upload speeds.

Fiber distribution

Having multiple fibers or tubing installed throughout the building enables quicker installation of connections to tenants.

Wi-Fi coverage

Providing free Wi-Fi in common areas enables tenants and their guests to remain connected throughout the building.

Telecommunication room

A location in the building where service provider equipment is installed. Separation of telecommunication equipment from that of other utilities, such as electricity, gas or water, reduces the risk of internet outages by reducing personnel access to equipment servicing tenants.

Signed access agreements

Signed access agreement documents indicate that an agreement is in place between the landlord and the ISP that owns cables and equipment in the building. The agreements limit the potential for future conflicts or challenges between landlord and provider that may threaten the ability of tenants to maintain their current or future internet connectivity.

Tenant connectivity guide

Having a guide in place outlining the designated areas and routes for telecommunications cabling as well as information regarding access for new providers assists tenants with new connectivity installations.

Contact the WiredScore Team for any questions on connectivity or the certification.
